PSA - SK Achieves Milestone in National ID Registration

Date of Release: 30 January 2025
Reference No. 65R12 - PR2025 - 05

As of December 31, 2024, Philippine Statistics Authority-Sultan Kudarat (PSA-SK) had successfully registered a total of 736,498 individuals in Sultan Kudarat Province or 86.24% of the 2020 CPH total population. This significant milestone in the National ID registration underscores the PSA's commitment in ensuring all residents have access to a valid and reliable proof of identity.

In 2024 alone, PSA-SK registered 88,685 individuals aged 1 year old and over. The Rehistro Bulilit Campaign played a crucial role in increasing National ID registration, focusing on registering young children aged 1 to 4 years old. This initiative emphasizes the PSA's dedication in making the National ID system inclusive and accessible to all ages.

Furthermore, the Department of Social Welfare and Development (DSWD), through its Family Development Sessions (FDS), actively assisted the PSA in registering all beneficiaries and their families for National ID, thus facilitating easy access to government benefits and services.

The National ID serves as a vital tool for inclusive governance and efficient public service delivery. It aims to provide all Filipinos, including those in the most marginalized sectors, with a valid proof of identity that can be easily and conveniently used in various transactions with both public and private entities.

PSA-SK encourages all eligible individuals in Sultan Kudarat who have not yet registered for their National IDs to take advantage of the convenient registration services while mobile registration is still available in their locality.
